

PROJECT : SOUND-RESPONSIVE IMAGE

To get us back in the groove with P5, we're going to start with making a simple image, then making it interactive through sound. The image can be a face, a landscape, or an abstract design. This mini-project is worth **50 points**.

Scoring:

20 points – at least 3 shapes that change in size or position

20 points – at least one shape (or background) that changes in color

10 points – uses a complementary color scheme (can use multiple shades & tints of both colors, and an accent color)
